Project Title: Seattle Sounders Website

I'd like to make a website with multiple pages for each of the subtopics. There will be a navigation bar across the top with links to each of the pages. The landing page will be the general overview page.

- **Home page/overview** - General introduction to the city, the stadium, rivalries & significant players
- **Team colors/crest** - Evolution of crest, team colors and jerseys over the years
- **Team History** - Recap of history in the USL and before since the beginning of the team in 1974.
- **Inaugural Season** - Overview of first season in the MLS in 2009
- **Significant Moments** - MLS Cup titles, US Open Cup titles, Supporters Shield and other significant moments.
- **2019 Season** - Overview of 2019 season in which they won the MLS Cup
